FOREWORD

The Trustees of The Metropolitan Museum of Art have authorized the sale of 6,664 coins no longer required for exhibition or study purposes, with a view to better serving the interests of art and numismatics by making the coins available to a wider audience.

The Museum received the bulk of its coins over sixty years ago. The birth of the collection dates back to 1874, when the Museum acquired its earliest coins from the collection of its first Director, General Louis Palma di Cesnola. But it was not until 1899, when the Museum fell heir to the Joseph H. Durkee Collection of six thousand coins, that its holdings in this field began to attract attention. Five years later, in 1904, the Museum received as a gift from Darius Ogden Mills over 3,000 coins collected by Judge Elbert Eli Farman in Alexandria. The following year, J. Pierpont Morgan donated the major collection of John Ward, previously catalogued by J. F. Hill of the British Museum; and in 1908, the Museum bought some 523 coins from J. Grafton Milne.

In the meantime, the American Numismatic Society, through its energetic President, Archer M. Huntington, entered into negotiations with the Museum that culminated, on March 15, 1909, in a resolution by the Museum's Trustees which stated "It is not the policy of this Museum to acquire or accept coins which have a purely numismatic interest, but to confine itself to the development of its collections of coins and medals which have a value as works of art or as illustrations of the history of the fine arts."

This resolution brought the serious collecting of coins by the Museum to an almost complete halt. In the Greek and Roman Department, for instance, although occasional gifts and bequests continued to be accepted, no coins were bought after 1908. The understanding with the American Numismatic Society was carried one logical step further in 1917, when the Museum began lending to the American Numismatic Society the bulk of its holdings in coins – almost 10,000 – retaining only the John Ward collection and some of the later gifts and bequests. While the American Numismatic Society has held most of the Museum's coins for over forty years, they have not been able to keep the bulk of them on exhibition. The collection of Greek and Roman coins was last shown to the public in 1939. Thereafter the coins were no longer displayed as a collection, although from time to time selected coins were integrated into exhibitions.

Ideally, coins are best studied when held and turned in the hand, and this could hardly be done in a Museum that has millions of visitors each year. Moreover, the Trustee Resolution of 1909 had the effect of restraining the Museum's activity in this field. Most importantly, the Museum has not been in a position to provide those services to numismatists that are expected of the holder of a major collection. In short, the Museum's coin holdings, so optimistically started almost a hundred years ago, have been in a curious kind of limbo for many years.

Thus it came about that, in December of 1970, serious thought began to be given to a clarification of the Museum's attitude toward coins. Obviously there was no reason to abandon coins entirely, for as artistic and historic documents coins have their own secure position. The seven departments involved, therefore, were asked to select for retention whatever coins they desired of artistic or historic value. For example, coins that had come to the Museum through excavations in Cyprus, Anatolia, Egypt and the Near East, furnishing important evidence for the chronology and historic context of their sites, have been kept. By the same token, research into Roman imperial portraiture was thought to be aided considerably by the study of physiognomies as they are rendered on Roman coins. Thus, the Trustees believe that a harmonious balance has been struck between the needs of the Museum and its desire to better serve the interests of the numismatic world.

No gifts to the Museum to which any conditions were attached have been included in this sale. The Museum has closely consulted the American Numismatic Society, and greatly appreciates the assistance it has provided in this undertaking through the good offices of Margaret Thompson, the Chief Curator. In recognition of the Society's help and cooperation in caring for the collection over the past fifty-five years, certain coins have been turned over to it for inclusion in its collections. The remainder of the coins being disposed of are being offered for public sale so that all interested collectors will have an opportunity to acquire them.

INTRODUCTION

A Biographical Note on John Ward, J.P., F.S.A.

At the beginning of this century, it was not unusual for collections of ancient coins to be professionally described and the catalogue privately printed. The collection formed by Sir Herman Weber is an example of this as is the series of Greek coins collected by John Ward. These were described by Sir George Hill and became the basis of John Ward's book, "Imaginary Rambles in Hellenic Lands", forming eventually the second part of the book entitled "Greek Coins and their Parent Cities", published in 1902.

John Ward was born in Belfast in 1832 and went to school at the Royal Academical Institution. He originally intended to become an architect, having a great aptitude for drawing, but owing to the early death of his father in 1847, he joined his two half brothers in the family stationery and lithographic business. Marcus Ward, John Ward's father, commenced business on his own account in 1833, moving to larger premises in 1841. Under the guidance of young John Ward the business flourished and moved again in 1855, also opening branches in London at Oriel House in Farringdon St. and overseas. The principal occupation of the firm was printing Vere Foster's copy and drawing books for use in schools but a large staff of artists was employed on the lithographic side, including Walter Crane, Kate Greenaway, Hugh Thomson and John Vinycomb, the latter well-known for his illuminated and heraldic work. A disagreement with his half brothers in 1876 caused John Ward to withdraw from the Company and he then carried on publication of the Vere Foster copy books independently. The once prosperous fine art and colour printing firm of Marcus Ward and Company sold out to Messrs. McCaw, Stevenson and Orr in 1899, their business having rapidly declined and their only memorial now being a street named after the founder, Marcus Ward.

Freedom from the family business enabled John Ward to follow some of his many interests. He became an active member of the Harbour Board in Belfast and generally spent the winter in Egypt or Sicily. Here he was able to indulge in his favourite hobby of sketching and gathered material for the books he subsequently was to write. His travels in Egypt made him an enthusiastic collector of Scarabs and he wrote "The Sacred Beetle" published in 1901. Prior to this he published "The Liber Studiorum of Turner as a Drawing Book for Students of Landscape Art" in 1890 and "Pyramids and Progress: Sketches from Egypt" in 1900. "Our Sudan Its Pyramids and Progress" 1905 and an introduction to K. Miklail's "The Copts in Egypt" were the last of his main works although he was a frequent contributor to magazines and newspapers. "Imaginary Rambles in Hellenic Lands" contains many sketches and paintings by the author. As well as purely geographical and historical material, there is also a comment on the commercial and political situation of the day. On the cost of living in Corfu, for example, he says "With the exchange received from British Sovereigns one can actually live here for nothing!"

George F. Hill, then Assistant Keeper and finally Keeper of Coins and Medals, who was the first Numismatist to become a Principal Librarian of the British Museum, was asked by Dr. Barclay Head to catalogue John Ward's collection. Since that time, much research has been done and new attributions given to the coins in a number of cases. The collection illustrates the wide panorama of Greek coinage. Despite Ward's remarks on the disposal of Canon Greenwell's collection to the United States, his own, having been purchased by Mr. J. Pierpont Morgan, followed soon after. John Ward died in 1912 at Farningham in Kent, but was buried in Holywood, a few miles from the scenes of his early life.

A quotation from the Introductory Chapter of "Greek Coins and their Parent Cities" echoes the thoughts of every collector of ancient coins: "Greek coins are becoming every year, more difficult to obtain even at very high prices"!

PREFACE

This sale of the major portion of John Ward's collection of Greek coins has given us the opportunity to reattribute a number of the pieces in the light of modern research and scholarship. Many coins, not appearing in the original plates, have been additionally illustrated. The majority had been lacquered many years ago and this had left dark irregular patches on the surface of the coins. Consequently some pieces, although having had the lacquer carefully removed are still somewhat discoloured and this will be seen on the illustrations which are produced from direct photographs.

Sir George Hill had at his disposal a very limited number of reference works but the Bibliography to this sale will show at once the extensive literature now available to students of Greek coins.

A preface to a collection of this size and scope cannot begin to list the coins worthy of bringing to the readers' attention, however the following pieces outstanding for their quality or rarity must be mentioned (listed in catalogue sequence):— The tetradrachms of Agrigentum (lots 114 and 115) and Naxos (lots 176 and 179); the Syracuse decadrachms (lots 236 and 237) and tetradrachm (lot 238) by Kimon; the decadrachm by Euainetos (lot 240); the tetradrachms of Ainos (lots 312 and 314); the tetradrachm of Amphipolis (lot 362); the stater issued by the Amphictionic Council at Delphi (lot 396); the staters of Aegina (lot 422) and Elis (453). Most of these coins have been illustrated in the colour enlargements and confirm John Ward's statement that "Hellenic coins afford a fascinating study, interesting in several remarkable features beyond any medallic art the world has ever seen".
